

REMARKS

Claims 57-68 and 108-119 have been amended to correct a minor grammatical informality. Specifically, "to be a display panel" has been changed to "to form a display panel."

Claims 74 and 83 have been amended to correct a minor grammatical informality. Specifically, "and" has been inserted between "said gate signal line," and "said power source supply line," which is consistent with claim 75.

Each of claims 98-101 has been amended so that the preamble is consistent with the claim from which it depends. Specifically, in claim 98, "active matrix type device display panel" has been changed to "method of manufacturing a display panel." In claims 99-101, "method of manufacturing a" has been added before "display panel."

New claims 124-171 have been added.

Examination on the merits is requested.

Respectfully submitted,

Eric J. Robinson
